

Ahmed Yasser

Date of birth: 23/11/2005 | **Nationality:** Egyptian | **Gender:** Male | **Phone number:**

(+20) 01006054050 (Mobile) | **Email address:** ahmeddyasserr23@gmail.com | **Website:**

<https://ahmedddyasserr.netlify.app/> | **LinkedIn:**

<http://linkedin.com/in/ahmed-yasser-15892a31a> | **Whatsapp Messenger:** 01006054050 |

Address: Rehab city, new Cairo, Cairo, Egypt, Building no 15, 11841, Cairo, Egypt (Home)

ABOUT ME

Motivated Computer Science undergraduate at Misr International University with hands-on experience building AI-powered systems including computer vision pipelines, face recognition, and real-time object detection. Proficient in Python, C++, Java, and JavaScript with a strong foundation in data structures, algorithms, and object-oriented design. Combines rigorous academic discipline with the focus and resilience of an accomplished international competitive swimmer (20 medals). Seeking an AI Engineer role to apply machine learning and software engineering skills to real-world problems

Personal Strengths:

- **Adaptability:** Thrives under pressure and excels in dynamic environments.
- **Discipline:** Combines athletic training rigor with an organized academic approach.
- **Teamwork:** Values collaboration and brings a positive, goal-oriented mindset to projects.
- **Leadership:** Experienced in leading and motivating others, both in sports and group tasks.

EDUCATION AND TRAINING

01/09/2023 – CURRENT Cairo, Egypt

STUDENT Misr International University (MIU)

Website <https://www.miuegypt.edu.eg/#openModal>

LANGUAGE SKILLS

Mother tongue(s): **ARABIC**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C1	C1	C1	C1	C1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

SKILLS

Data Structures | C++ | Object - oriented programming | Javascript(Nodejs, ExpressJs) | DATA STRUCTURES AND ALGORITHMS WITH JAVA | Good programming skills (C, Python, Java, C++) | Computer Organization | Digital Logic Design | Digital Media Marketing | algorithm development

PROJECTS

Cinema Booking Web Application

Developed a full-stack web app for browsing current and upcoming movies, booking seats, and pre-ordering snacks. Implemented user authentication, ticket reviews, and a countdown timer for upcoming releases. Designed a responsive interface with efficient backend and database management.

- Interactive seat booking system
- User authentication & profile management

- Ticket reviews and ratings
- Snack & beverage pre-ordering system
- Responsive UI/UX design

2026 – 2026

Real-Time Color Detection & Tracking System

Developed a computer vision application using OpenCV and Python to detect and track objects of a specific color in real time via webcam. Implemented HSV color space masking and contour detection to identify objects and draw bounding boxes around them dynamically. Optimized performance for continuous video processing with accurate object localization.

Technologies Used:

- Python
- OpenCV
- NumPy

05/10/2024 – 12/10/2024

Tic Tac Toe GUI Project with Night Mode | C++

Developed an interactive Tic Tac Toe game featuring a graphical user interface (GUI) and a customizable night mode. The project highlights proficiency in C++ programming, object-oriented design, and user-centric development. Designed to deliver an engaging and accessible gameplay experience with an added focus on visual comfort through night mode functionality.

Key Features:

- Responsive and intuitive GUI for seamless interaction.
- Night mode option for improved user experience in low-light settings.
- Robust game logic ensuring fairness and consistent performance.
- Modular and maintainable code structure, enabling scalability.

Face Recognition-Based Attendance Management System

A desktop-based face recognition attendance system built using Python, Tkinter, OpenCV, face_recognition, and MySQL (XAMPP). Features: offline face training, real-time multi-face recognition, automatic attendance marking, lecture and instructor management, CSV and PDF attendance reports, and a thread-safe GUI

15/02/2023 – 20/02/2023

Easy Lance | Freelancing Instagram Page with AI Job-Finding Features

Conceived and developed Easy Lance, an innovative Instagram page designed to simplify the freelancing job search process. Integrated an AI-driven feature to match users with suitable job opportunities efficiently, while creating a visually engaging and impactful brand identity.

Key Contributions:

- Developed the core concept and branding, including the design of the logo.
- Produced promotional videos, advertisements, and animations to enhance user engagement.
- Managed the creation of all social media posts, ensuring consistent and high-quality content.
- Leveraged AI technology to deliver personalized job recommendations tailored to user needs.
- Built a platform focused on accessibility and innovation, transforming how freelancers connect with opportunities.
